Question – 8

The following information has been obtained from financial accounting and cost accounting records.

	Financial Accounting (₹)	Cost Accounting (₹)
(i) Factory overhead	94,750	90,000
(ii) Administrative overhead	60,000	57,000
(iii) Selling overhead	55,000	61,000
(iv) Opening stock	17,500	22,500
(v) Closing stock	12,500	15,000

Required: Indicate under-recovery and over-recovery and their effects on cost accounting profit.

[Note: You are not required to prepare reconciliation statement]

Solution

	Financial Accounting (₹)	Cost Accounting (₹)	Difference (₹)	Under/Over recovery	Effect on cost accounting profit	Net effect on cost accounting profit*
Factory overheads	94,750	90,000	4,750	Under-recovery	Increased	To be reduced or deducted
Administrative overheads	60,000	57,000	3,000	Under-recovery	Increased	To be reduced or deducted
Selling overheads	55,000	61,500	-6,500	Over-recovery	Decreased	To be added
Opening stock	17,500	22,500	-5,000	Over valuation	Decreased	To be added
Closing stock	12,500	15,000	-2,500	Over valuation	Increased	To be reduced or deducted

*Taking cost accounting profit as base

Question – 9

NT Ltd. showed a net loss of ₹ 9,000 as per their cost accounts for the year ended 31-03-2025. However, the financial books disclosed a net profit of ₹ 7,000 for the same period. The following information was revealed as a result of scrutiny of the figures of both the sets of books:

	(₹)
Factory overheads absorbed	52,000
Selling & distribution overhead over absorbed	6,000

Administrative overheads under absorbed	7,500
Interest on loan	8,800
Dividend received	9,000
Factory overheads charged	45,000
Depreciation charged in financial accounts	42,000
Depreciation charged in cost accounts	45,000

There is the difference in the value of closing stock of finished goods due to varying basis of valuation. 500 units of closing stock is valued at ₹ 41,000 in cost accounts whereas market price per unit of closing stock is ₹ 80 per unit.

It is found that there is still a difference in the reconciliation statement after considering all of the above which is due to the excess of raw material consumption in cost accounts.

Prepare:

- A reconciliation statement taking net loss as per cost accounts as base, and
- Find out the excess of material consumption during the period in cost accounts effectuated the difference in reconciliation.

Solution

(i) Reconciliation Statement

	(₹)
Net loss as per cost records	(9,000)
Add: Excess of material consumption (see part – ii)	8,300
Add: Factory overheads over absorbed (52,000 – 45,000)	7,000
Add: Selling & Distribution overhead over absorbed	6,000
Add: Dividend received	9,000
Add: Depreciation over charged (45,000 – 42,000)	3,000
Less: Administration overheads under absorbed	(7,500)
Less: Interest on loan	(8,800)
Less: Over valuation of closing stock of finished goods [41,000 – (80 × 500)]	(1,000)
Profit as per financial records	7,000

(ii) Statement showing calculation of excess of material consumption

	(₹)
Net loss as per cost records	(9,000)
Add: Excess of material consumption (see part – ii)	Y
Add: Factory overheads over absorbed (52,000 – 45,000)	7,000
Add: Selling & Distribution overhead over absorbed	6,000
Add: Dividend received	9,000
Add: Depreciation over charged (45,000 – 42,000)	3,000
Less: Administration overheads under absorbed	(7,500)
Less: Interest on loan	(8,800)
Less: Over valuation of closing stock of finished goods	(1,000)

$[41,000 - (80 \times 500)]$	
Profit as per financial records	Y – 1,300

Therefore, $Y - 1,300 = 7,000$

Thus, $Y = 8,300$

Excess of material consumption during the period in cost accounts is ₹ 8,300.
